

What resources are available to educate my patients on potential disease-related complications of their myeloma?

Ajay K. Nooka, MD, FACP

Assistant Professor
Division of Bone Marrow Transplant
Winship Cancer Institute of Emory University
Atlanta, Georgia

Welcome to *Managing Myeloma*. My name is Ajay Nooka. I am an assistant professor in the Division of Bone Marrow Transplant at the Winship Cancer Institute of Emory University. I am frequently asked, "What resources are available to educate my patients on potential disease-related complications of their myeloma?" Your doctor's office is the first place to start. Your doctor should be able to provide educational resources for potential disease-related complications and probably a consultation with your pharmacist to educate on the potential therapy-related complications is needed. Very good clinical resources are available online at multiple websites such as the American Cancer Society and other online resources such as the educational tools at *ManagingMyeloma.com*, International Myeloma Foundation, and Multiple Myeloma Research Foundation, other ones are Association of Community Cancer Centers. These are all good websites where you can find potential disease-related complications of multiple myeloma. Other websites of significance are ASCO educational website (American Society of Clinical Oncology), or the Lymphoma & Leukemia Society should be good resources to get updated on the potential disease-related complications. Thank you for viewing this activity. For additional resources, please view other educational activities on *ManagingMyeloma.com*.
